PROFILE Recently graduated software developer with a passion for expanding my knowledge and growing professionally. Specialized in web and desktop application development, I stand out for my ability to learn new technologies through the creation of innovative projects. I have actively participated in events such as hackathons, where I collaborated with a team of peers to create innovative solutions.

**PROFESSIONAL
EXPERIENCE**

Elkay Interior Systems Latin America, S. de R. L. de C. V.
Intern T.I | 2023 – 2024

- Development of the Digital Document Center module to eliminate the use of paper in the administrative environment.
- Development of flow charts and definition of entity-relationship tables.
- Design of system views using Figma, ensuring optimal usability and functionality.
- Development of controllers to manage groups and documents in the backend, implementing CRUD operations.
- Use of Postman to perform backend testing and ensure correct API functionality.
- Implementation of views using HTML, CSS and TypeScript in the frontend.
- Adoption of agile methodologies, such as Scrum, for weekly sprint allocation and efficient collaboration in Azure DevOps.

Hackathon del Dev
Participant | April 2024

- Leadership in the development of the frontend of the "Community Events Platform" project.
- Design and implementation of all views, including landing page, login, account creation and home page.
- Use of React, Chakra UI and TypeScript to create a responsive and innovative application.
- Development of a platform for the creation of non-profit social and community events, promoting positive actions in the community.
